Definitions

Accessibility – The term accessibility means giving people of all abilities opportunities to participate fully in everyday life. It is used to describe how widely a service, product, device, or environment is available to as many people as possible. Accessibility can be seen as the ability to access and benefit from a system, service, product, or environment.

Barrier - Barriers are obstacles that limit access and prevent people with disabilities from fully participating in society. Most barriers are not intentional. Barriers usually arise because the needs of people with disabilities are not considered from the beginning.
